

PharmScan.NET

Mobile Access to Pharmacy Data

A companion product to FrameworkLTC

Problem: "I'm tired of being tethered to my workstation and carrying products to a central scanning station."

Solution: PharmScan.NET – software for Microsoft Windows Mobile® PCs with barcode scanners.

PharmScan.NET, a companion product to FrameworkLTC®, frees you from a desktop computer so you can work anywhere in the pharmacy. Running on a handheld computer with barcode scanning capabilities, PharmScan.NET lets you multitask, whether you're back in the shelves, in the tote area or up front – storing real-time information in the FrameworkLTC database for more accurate reports and inventory management.

Maximum Mobility

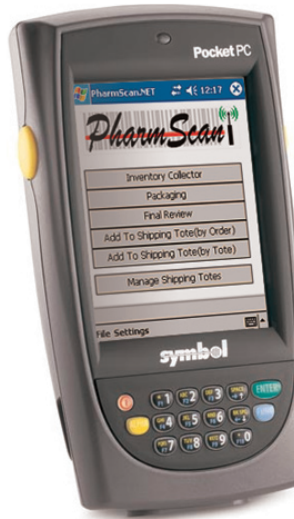

With PharmScan.NET in hand, you can easily:

- Automate physical inventory collection
- Streamline formulary maintenance
- Eliminate dispensing errors
- Provide an electronic final review of prescriptions
- Track shipping totes to facilities

Absolute Accuracy:

PharmScan.NET matches the barcode on the prescription label to the manufacturer's barcode on the product's package – anywhere in the pharmacy. An audible signal and on-screen warning alerts you to mistakes.

Think cell phone vs. landline. That's the benefit you get with PharmScan on a handheld, for mobile access to your pharmacy's computer system.

Inventory Made Simple

Use PharmScan.NET's Inventory Collector to perform a physical count of products in the formulary. Scan items on your shelves, then download data to your central system by docking the handheld in a cradle. The software automatically updates quantities on hand and creates variance reports.

Tracking Totes

Use the Manage Shipping Totes function to record shipping totes' destination facility, expected ship date, responsible shipper and processing date. Scan both the prescription label order number and shipping ID as the order goes in the tote. If discrepancies exist, you'll hear an alarm. Data is automatically sent to FrameworkLTC for printing packing slips.

Contact SoftWriters TODAY for more information or to place an order: 412-492-9841.
